

# Pricing Insights **API**

The auto transport industry moves fast—your pricing decisions should, too.

**Super Dispatch's new Pricing Insights API** is designed to revolutionize how you manage pricing. Whether you're a shipper, broker, dealer, or carrier, this game-changing tool will help you make informed, data-backed decisions that drive profitability and keep you ahead of the competition.

## What is Pricing Insights API?

The Pricing Insights API delivers real-time market pricing recommendations powered by advanced machine learning algorithms that analyze vehicle types, routes, and historical data for precise, optimized quotes. Each recommendation includes a Confidence Score (0%-100%) for quick, reliable decision-making, and the API seamlessly integrates with your existing systems, streamlining workflows without interruption.

## How it Helps Your Business

### Boost Profit Margins

Quote confidently with dynamic pricing that improves efficiency and prevents under - or overpricing.

### Close Deals Faster

Offer instant quotes supported by data-driven insights to outpace your competitors and win more business.

### Simplify Your Operation

Automate pricing and decision-making processes, freeing up resources to focus on scaling your operations

### Maximize Efficiency

Fine-tune your route planning, decrease empty miles, and improve profitability with accurate, route-specific insights.

## Experience the Difference

**“ Pricing Insights strategically prices our loads. Any money we save is extra income to the stores. Last year, we were able to add nearly \$50,000 in extra income using Pricing Insights. ”**

**Jim Miletta**, Kunes Auto Group

## Take Charge with Pricing Insights

Don't get left behind. Join forward-thinking businesses already unlocking the power of real-time pricing to dominate their markets. Sign up for Super Dispatch's Pricing Insights API today and experience smarter, faster, and more profitable pricing strategies.
